Find out what you need to know

On October 1 2018 PA will be enforcing the majority of the 2015 ICC Model Codes. Transitioning from 2009 codes to the 2015 versions means there will be a significant amount of changes in the enforceable code updates. While some updates are mostly administrative, some of them may warrant changes in the building practices and design techniques.

101—Topics to be discussed during this session include: upcoming changes to the PA UCC, which code provisions will be enforceable on October 1, 2019: overview of the code provisions amended as part of the RAC review process and where to go for more information.

102—This session will present some of the major code updates to Pennsylvania including: air tightness requirements and blower door testing, mechanical ventilation, framing requirements with decks and more.
